WA 2024
GERALDTON

Powered By:

Term Four, 2024 | Geraldton, Western Australia

Coming to Geraldton in 2024, the EduFest WA Professional Learning Day will empower local educators to create innovative learning experiences for their students that help them develop the work capabilities required to thrive in the future of work.

This one day professional learning event will step attendees through the design thinking process, as they hear from inspiring speakers, showcase their ideas, and build sustainable partnerships with industry and the broader community. Working collaboratively with colleagues across sectors, attendees will be working to redesign curriculum, design impactful initiatives for their community, and craft innovative learning experiences for their students.

The EduFest WA Professional Learning Day will see attendees exploring how they can help their students develop the following work capabilities in innovative and engaging ways:

Problem Solving

Innovation

Communication

Creativity

Resilience

Leadership

Reasoning

Teamwork

Key Details

Explore The Program

The EduFest WA Professional Learning Day has been designed to step attendees through the design thinking process as they create impactful solutions, initiatives, and learning experiences for their students.

Throughout the day, attendees will have an opportunity to hear from inspiring speakers, network with industry and community leaders, and collaborate with educators from across sectors. Our program for 2024 includes the following:

Keynote Address | Future of Work

Attendees will be hearing from innovative educator, business leader, and generational consultant, Scott Millar, as he unpacks the emerging technologies changing how we live, work, and play, and shares his strategies for how we can all find opportunity in an uncertain world.

Professional Learning Session | How Might We...

Attendees will be challenged to develop a 'how might we' statement centred around how they can better help their students develop the skillsets, mindsets, and experiences required to thrive in the workforce of the future.

Fireside Chat | Building Innovative Learning Experiences

We'll be sitting down with a selection of innovative educators to hear their stories and experiences from building a culture of innovation in their communities and how they have worked to build craft innovative and impactful learning experiences for their students.

Professional Learning Session | Design Sprint

Attendees will have the opportunity to research how other schools and communities around the world are approaching the 'how might we' statements they are working to solve. From here, they will engage in a design sprint as they develop a diverse selection of solutions for the 'how might we' statement they have identified for their community.

Soapbox Session | Industry Innovator

A selection of community and industry leaders will join us for a showcase opportunity. This will commence with each industry and community partner delivering a short 'Soapbox' on who they are, what they do, and how they can help innovative educators. From here, attendees will have the opportunity to connect with these industry leaders.
